Util

This project provides utility functions for handling text input, copying text to the clipboard, and managing dark mode settings. It also includes a menu loaded from an external HTML file.

Features

- Load and sanitize an external HTML menu
- Toggle dark mode and save preference to `localStorage`
- Split input text into chunks and display them
- Copy text to clipboard and remove the node

Getting Started

Prerequisites

- A web browser
- Internet connection

Installation

1. Clone the repository:

```
git clone https://github.com/yourusername/util.git
```

2. Navigate to the project directory:

```
cd util
```

Usage

1. Open split.html in your web browser.
2. Enter text in the input field and click the "Split" button to split the text into chunks.
3. Click the "Copy text" button to copy the text to the clipboard.
4. Use the dark mode toggle to switch between light and dark modes.
